Presentation:

Steven Winslow, put together an overhead presentation to solicit feedback from the public regarding the current Open Space plan. The presentation focused on Burnham's Field and a plan to revive that low income area with CPA funds.

Following the presentation, Steve asked for a motion to submit the current plan for grant consideration and to appropriate departments within city for review. No objections were noted, however, one member did express concern that the Plan should not face sustentative changes by city officials, but rather by the committee only. The OSRC member cited position changes within the city government as deterrent for a cohesive plan that reflects public needs.
