Whales are mammals

A close-up photograph of a whale breaching the ocean surface. The whale's dark, wet skin is glistening with water droplets. A large, energetic splash of white water is visible behind the whale's head and back, contrasting sharply with the deep blue of the sea and the clear sky. The whale's head is angled upwards and to the left, showing its eye and the top of its head.

They have hair.

They give birth to live young.

The young nurse from their mothers.

They are warm-blooded.

They breath air.
