There was one order of business,
a request for Certificate of Appropriateness
For alterations, and additions to the building at 23 Dale Ave. known as 'The Eagan Building and the garage to the rear of said building.

Meredith Fine, representing the owners, explained that the owners wanted to do both some renovation and restoration of the building. They need to remove the vinyl siding on the building and determine what the surface underneath (original clapboards) is like. Also they wish to add a second story to the detached garage in the rear. After some discussion it was decided that given the undetermined plans of new siding, the hearing would be continued until plans are made.

Motion: it was moved and seconded to continue the hearing on request for COA To an undetermined future date. Unanimously approved.

Respectfully submitted,
